Increase your profit margins!

Planning, design and distribution of photovoltaic equipment for commercial partners

Technical Studies
We plan and set up systems of any power output which include all elements required for installation: modules, inverters, and mounting systems.

Planning and design
Our warehouse and transportation team are at your disposal to ensure on-time deliveries and rapid response to your needs.

Distribution
Helios Strategia supports, accompanies and guides you in all your photovoltaic projects. We help you with your technical studies including module layout and estimated production.

HELIOS STRATEGIA - 14, avenue d'Eylau - 75116 PARIS, FRANCE.
Phone number: +33 (0)9 70 46 81 32 - Email: contact@heliostrategia.com

**General Engineers**
CEO: Ran Rachlin  
Marketing Manager: Adva Harel  
Fields of Activity: General Engineers has a proud sixty-year history of exceptional success in the electrical engineering industry. We guarantee the delivery of world-class comprehensive turnkey solutions in every area – from manufacturing and building, to industry and Government. General Engineers and our subsidiaries are ISO–9002 certified.  
The General Engineers service comprises four main areas: Energy & Infrastructure, Systems Integration, Automation & Software Solutions and power control. Under each of these umbrellas, we have established a winning team, whose combined technological know-how and vast experience ensure delivery of the kinds of solutions that help companies to succeed. The four General Engineers teams integrate seamlessly, together with our subsidiaries providing solutions which incorporate all the elements of a first-class engineering service. The group represents worldwide manufacturers of leading technological equipment.  
The General Engineers commitment to customer satisfaction endures beyond the design and construction. We remain with you even after your project is complete, providing the required technical and sales support. At General Engineers, we never stop. We continually push ourselves further and harder to make sure to stay ahead. Meaning, we are always searching for ways to improve on our performance. One of the ways we do this is by acquiring subsidiary companies to support our team and to enhance our results. All the divisions at General Engineers function together with a professional synergy which provides the ideal environment for the development of our superior and high-quality solutions. At General Engineers, you can be assured of service that is comprehensive, efficient, and most importantly, meets your specific requirements.

ISERD
CEO: Marcel Shaton
Fields of Activity: ISERD is the Israeli–Europe Directorate for the European R&D Framework Program (FP7), operating through the Office of the Chief Scientist of the Ministry of Industry, Trade and Labor.
The Framework Program brings together academia and industry, in order to strengthen R&D Cooperation within Europe, with a total budget of €50 billion over a period of 7 years. The program enables Israeli entities to cooperate in technological development with European industries, research institutions and universities, and to showcase Israeli abilities.
ISERD is operating as a national contact point for the Framework Program: * Actively assists academic and industrial entities in preparing and submitting their EU–RTD program proposals; * Provides help identifying various partners and business opportunities; * Offers assistance, training and supporting services to interested parties; * Works on information dissemination and raising awareness within Israel; * Organizes events such as training sessions, seminars, conferences and newsletters.
